DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment after non-final filed 20 August 2007.

Drawings

2. The new drawings submitted 13 September 2007 have been accepted.

Specification

3. The new abstract filed 20 August 2007 has been accepted, and the objection made against the abstract has been withdrawn.

Declaration Under 37 C.F.R. 1.131

4. The declaration under 37 C.F.R. 1.131 filed 20 August 2007 has been acknowledged and accepted.

Claim Rejections - 35 USC § 103

5. The 35 U.S.C. 103(a) rejection against claims 1-15 under Norton et al. in view of Muffoletto et al., and the 35 U.S.C. 103(a) rejection against claims 1-15 under Harguth et al. in view of Muffoletto et al. or Mileham et al. have been withdrawn in view of the timely filed declaration acknowledged above.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-15 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,819,544.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and published patent claim structure for a dual anode capacitor wherein the cathode is centered between the two anodes within an encasement.
